

TOWN OF HILLSBOROUGH

1600 Floribunda Avenue
Hillsborough, CA 94010-6418
Phone 650-375-7400

Water meter data collection and accuracy

- Water meter reading is done via electronic data collector, connected through a “wand” held by the Town’s meter readers. The wand relays the electronic reads to the collection system to prevent operator error.

- In the event of large reading spikes, the data collection system notifies Public Works Supervisors, and manual meter re-checks are issued to verify the meter read accuracy.

If you would like to have your meter re-checked, please call (650)375-7400 and a meter reader with the Department of Public Works will be promptly dispatched to manually recheck your water meter.
