

## Crown Castle Wireless Communications Facilities Applications Update

The Town thanks those who attended the December 7<sup>th</sup> Community Meeting, and those who have submitted letters, e-mails, and voicemails regarding Crown Castle's applications to install sixteen (16) wireless communications facilities. Please be assured that Town staff opens and reads all correspondence received on this topic. For those still interested in providing new or additional comments regarding the applications, please email City Manager Kathy Leroux (KLeroux@Hillsborough.net) or submit a letter to the City Manager's attention at Town Hall (1600 Floribunda Avenue). As stated in prior communications, public comments are being accepted until **Thursday, December 14, 2017 at 5:30pm**. The City Manager is expected to make a determination on the applications by **Thursday, December 21, 2017**.

Any determination by the City Manager on any of the applications may be appealed to the City Council by any interested party. Because the City Council serves as the appellate body in this case, Councilmembers are unable to participate in the current administrative review process or discussing the applications in any non-public hearing setting. Should one or more appeals be filed, information regarding public meeting dates will be sent out promptly via mailings and e-Announcements, as well as posted on the Town's website.

Below are links that include information on the proposed wireless applications:
