---

Dear Council members,

This is a brief letter having reviewed the final resolution No 21-61 posted on the city website.

Thank you for confirming in the resolution that for H31 tower, the alternative location H31 m1 is approved. We really appreciate the time the town council spent to understand the issue and explore alternative locations.

However there is no reference to alternate pole design considerations. Vice Mayor Krolik had raised this topic specifically for H31 during the hearing ,but we don't see it referenced in the final resolution. As the Town has already directed Crown to propose alternate pole designs for H12 (gate house) tower, we would request that the final design selected for H12 should also be used for H31 location. Both sites are in Carollands part of Hillsborough, and the H31 site is an equally trafficked site. Consistent pole design in the same neighbourhoods in HB would fit much more with our aesthetics.

Given Crown is already proposing alternate designs, there should be limited extra burden to comply with this request.

Thanks for your attention to this matter.

Respectfully

Raj and Jean Parekh
